

APPENDIX B
(marked-up version of Claim 22)

22. (NewAmended) A pressing apparatus for producing from a paperboard blank a food service paperboard container having an overturned rim provided with folds, comprising:

a first die having a curved pressing surface;

a second die positioned in opposing relation to the first die and having a curved pressing surface, at least one of said first and second dies being movable relative to the other of the first and second dies to cause an outer periphery of a paperboard blank to be pressed between the curved pressing surface of the first die and the curved pressing surface of the second die; and

a heating element embedded within a thermally conductive cast-in material to form a cast-in heater, the cast-in heater being removably positioned in the first die
~~The pressing apparatus according to Claim 19, wherein the cast-in heater is removably positioned in the first die, and including at least one air tube extending through a hole in the cast-in heater and through a hole in the first die, the air tube communicating with the pressing surface of the first die.~~
